

Discover our sustainable cycle

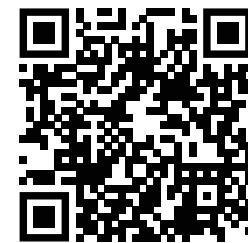

Home-Iso is not harmful: Due to the fiber properties and the thermal bonding there is no exposure to fine dust. Protective equipment is no longer required during installation. Irritation of the respiratory tract, eyes and skin is excluded. Home-Iso has been tested according to Oeko-Tex

Standard 100. This confirms that the product is free of harmful substances according to the currently valid human ecological requirements. Home-Iso enables a sustainable cycle - from production to recycling.

Product information

Health*

- Does not produce any respiratory, eye or skin irritations
- Free from any additives such as chemical binders
- Free from formaldehydes and organic compounds
- No fine dust or fiber pollution
- Install without protective clothing

Scan code and learn more about healthy insulation and living.

* Confirmed by independent institutes.

Thermal and acoustic performance*

- Thermal conductivity group WLG 035
- Sound insulation up to 56 dB
- Fire protection class B-s2 d0 according to EN 13501-1, M1 according to NF P92-504

Environment and durability

- Made from 100% polyester fibers, with up to 80 % recycled content
- Moisture and rot resistant
- No loss of insulation performance
- Guaranteed to retain its shape for at least 25 years
- Recyclable

Manufactured by:

TWE Meulebeke NV
 Marialoopsteenweg 51
 8760 Meulebeke

Status 3/2022

The alternative insulation material

The clean and safe insulation material for your home

Highest quality

Easy to install

Particularly sustainable

High insulation performance

The safe insulating material, that you can use with a clear conscience

All product benefits at a glance

Health

Home-Iso is free from harmful substances. This ensures that you are only breathing clean air.

Thermal insulation

Home-Iso fulfills the latest thermal insulation regulations as an alternative stand-alone insulation material.

Durability

Home-Iso is exclusively thermally bonded and remains dimensionally stable for a lifetime.

Noise protection

Home-Iso is characterized by its excellent sound insulation properties. It dampens sound by up to 56 dB and therefore ensures peace and quiet.

Sustainability

Home-Iso is made from up to 80% recycled PET bottles and is 100% recyclable.

Home-Iso is the healthy alternative to conventional insulation material, because our textile insulation material provides a pleasant and healthy living environment in which many generations will feel comfortable.

Exactly. Home Iso stands for a healthy indoor climate and maintains clean air for you to breathe.

Home Iso thus provides for healthy living?

Your benefits for safe and clean installation

Highest quality

Home-Iso stands for consistently high quality. Our alternative insulation material is made of polyester and is uniformly produced on the most modern machines using patented technology.

Easy to install

Home-Iso protects you as a user, because it does not pollute the air with fibers or fine dust. As a result, you do not need any protective equipment, which makes installation easier and more pleasant for you.
